

AMENDMENTS TO THE SPECIFICATION

Please add the following paragraph on a separate page after page 16, but before page 17:

Abstract

The present invention relates to an adenovirus comprising a P972 gene (also referred to as Gadd45 γ , CR6 or OIG37) gene known as a gene producing a cell growth-inhibiting protein for the treatment of cancers, a recombinant adenovirus that encodes P972 gene in the cell, a method of producing the above adenovirus and a method for the treatment of cancers by using the above vector or adenovirus. The recombinant adenovirus of the present invention can be used in the treatment of various cancers including cervical cancer, breast cancer and colon cancer.
